RAED KHARRAT

Software Engineer Student

About Me

Skilled in web and mobile development, I specialize in backend and frontend solutions with a focus on UI/UX design, optimizing user experience and engagement. I have developed and enhanced websites for small to medium-sized businesses, with a strong emphasis on problem-solving and collaboration. Currently, I am seeking a graduating internship to apply these skills and contribute to innovative projects within your team.

Experience

Mobile Developer Intern - Esprit School of Enginner
Jul-Sep 2024

Esprit Teacher Space is a mobile application designed to streamline teacher management, focusing on simplifying tasks related to student notes, grades, and performance tracking.

- Developed a robust and secure mobile application, ensuring scalability and security for managing sensitive student data.
- Collaborated closely with educators to gather requirements and design an intuitive user experience, aligning the app with real-world teaching needs.
- Enhanced functionality by implementing robust solutions, performing comprehensive testing, and debugging to ensure a seamless and efficient user experience.

Technology: Flutter - Node.js - NoSql - Figma - Mvvm Architecture - Figma - Agile

Fullstack Developer - Strapi
Jan-May 2024

Strapi-Gen is an innovative plugin designed to streamline development by automating the generation of database schemas and creating both standard and advanced web services.

- Dockerized the entire project, enabling seamless deployment and integration with Git repositories, ensuring efficient collaboration and version control.
- Implemented automated workflows, boosting productivity and minimizing manual intervention during development and deployment.
- Generated intuitive class diagrams, offering clear visual representations of the database schema, enhancing understanding and communication within the development team.

Technology: Node.js - React.js - LocalDB - Strapi - Git - Docker - Hexagon Architecture - CI/CD

Fullstack Developer - Soberank
Jul 2022 - Sep 2023

I specialize in backend development, building robust web and mobile applications using Node.js, Symfony, SpringBoot, Angular, React.js, and Flutter.

- Led full-stack development projects, focusing on cloud services and API integration, ensuring scalability, security, and performance throughout.
- Transformed client concepts into fully functional applications, guiding projects from initial design through to deployment while maintaining clear communication with clients.
- My collaborative approach and attention to detail ensured that client visions were realized seamlessly, delivering high-quality, tailored solutions.

Technology: PHP Frameworks - Java Frameworks - JS Frameworks - MySQL - NoSQL - MVC - Micro-Service
