KHARRAT RAED
SOFTWARE ENGINEER STUDENT

ABOUT ME

As a motivated software engineering student specializing in web and mobile development, I am passionate about creating innovative solutions that enhance user experiences. My studies and my professional experience have provided me with a solid foundation in programming languages, frameworks, and best practices, allowing me to tackle challenges with creativity and efficiency

PROFESSIONAL EXPERIENCES

Mobile Developer
Esprit, Ariana, Tunisia

Developed a mobile app for teacher management, streamlining student notes, .grades, and admin tasks
Collaborated with educators to gather requirements and ensure the app meets .their needs
.Implemented user-friendly interfaces and functionalities
Utilized [specific technologies/languages] for robust and scalable solutions
Technologies: NodeJs / PostgreSQL / Github / Figma / Flutter

FRONTEND DEVELOPER
Soberank, Leverkusen, Allemagne

Full support for the redesign of a showcase website for a German client, with a focus on improving the visual appearance and user experience
Dynamic programming with JavaScript for advanced features and smooth navigation
.**Technologie :** Html / Css / Javascript / Jquery / Github
.

WEB DEVELOPER
HealthyHive, Ariana,Tunisie

HealthyHive is a comprehensive online platform dedicated to promoting nutritional wellness and healthy living, with a focus on functional and visual improvement. AJAX search / API mailer / statistical graphs with jQuery library / .pagination, etc
Technologies: Symfony / jQuery / Bootstrap / GitHub / Twig

ACADEMIC EXPERIENCES

Vélou : Mobile Platform

developing a cutting-edge mobile application suitable for Android and iOS platforms, specially designed for cycling enthusiasts. This app focuses on seamless booking management and integrates secure online payment methods powered by Stripe. Additionally, users can avail discounts on promo codes to enhance their experiences
technologie : Android / Ios / Flutter / ExpressJs / MongoDB

Strapigen : Strapi Plugin

Developed a Strapi plugin to streamline backend development by providing features such as automatic REST API generation, Docker configuration setup, and seamless GitHub integration for code deployment
technologie : React Native/ KoaJs / Strapi / Github / Docker
.
